### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 rejected under 35 U.S.C. 103(a) as being unpatentable over Brown (US 6,139,362) in view of Vatterott et al. (US 2002/0100363) A1.

3. Brown discloses a device and method comprising a substrate having a first side and a second side, the substrate defining one or more holes from the first side to the second side; and a plastic member for mounting to the first side of the substrate, the plastic member having one or more heat stakes received by the holes defined on the substrate. However, the reference fails to disclose a recess located about the hole on the second side.

4. Vaterott et al. discloses a recess located about a hole on the second side (Fig. 1, ref. 135, 126).

5. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a recess located about a hole on the second side since one would be motivated to secure the fixing portion within the hole. The recess enables the fixing portion to be surrounded by the hole thereby improving the security of the device.
